Greg Soto, project architect, spoke in support and answered the Committee's questions. He explained how he calculated the open space statistics, and acknowledged that he can create an open space exhibit for the Planning Commission hearing. He also explained how the home on Lot A can be redesigned by shifting the garage and master suite above to the east to improve solar access and decrease privacy concerns.

The Committee spoke in support of the concept of a small lot PUD as an infill project. The Committee appreciated the architecture and the side-loaded garages. The Committee appreciated the thoughtful design and placement of the windows along the western elevations to mitigate privacy concerns. The Committee was concerned with solar access along the western side setback, primarily on Lot A, due to the proximity of this project to the residences to the east. The Committee appreciated the architect's willingness to redesign the home by shifting the garage and master suite to the east to increase light and air in the outdoor living space.

Vice Chair Berlin made a motion, seconded by Committee Member Hall, to recommend approval to the Planning Commission with the following condition:
