MEMORANDUM

TO: CITY COUNCIL
FROM: CHRISTOPHER MAGDOSKU, DIRECTOR OF PUBLIC WORKS
BY: SHANE TAYLOR, UTILITIES MANAGER
SUBJECT: MONTHLY WATER SUPPLY AND DEMAND UPDATE
DATE: MAY 23, 2017

RECOMMENDATION:
It is recommended the City Council receive and file the monthly Water Supply and Demand Report.

IMPACT ON FINANCIAL AND PERSONNEL RESOURCES:
Approximately two (2) hours of staff time is required to prepare the monthly report.

BACKGROUND:
On April 25, 2017, the City Council, by Resolution, rescinded the Stage 1 Water Shortage Emergency and related water conservation measures and restrictions. The City Council also requested that staff continue preparing the monthly water supply and demand updates.

In April, the City's water use was 41% below April 2013. The State's required reduction was based on the 2013 water usage. There is currently no required reduction imposed by the State Water Resources Control Board. The City is, however, still required to report monthly statistics to the State.

ANALYSIS OF ISSUES:
The United States Department of Agriculture (USDA) Drought Monitor, as of May 2, 2017, shows San Luis Obispo County as abnormally dry. Rainfall to date (July 1, 2016 to April 30, 2017) is 26.4” at the Corporation Yard gauge. Lopez Lake, as of May 10, 2017, is at 61% capacity (30,656 AF of storage).

The Lopez supply water year for 2016/17 ended on March 31, 2017. The City took delivery of 1,697 AF of Lopez water and pumped 232 AF of groundwater, for a total of 1,929 AF. This resulted in a per capita use of 98 gallons per day. The new water year began on April 1, 2017 and the current total available supply from Lopez is 2,290 AF, our normal entitlement, plus 1,249 AF of carryover. In addition, the City has 1,323 AF of
ground water entitlement from the Santa Maria Basin and 200 AF from the Pismo Formation.

Based on the projected water use of 2,500 AF, the City will meet the demand in water year 2017/18, using only 50% of current supply.

At the April 25, 2017 City Council meeting, the Council urged citizens to remain cognizant of how they use water, and that the previously adopted water saving measures are still in effect.

**ADVANTAGES:**
No advantages identified at this time.

**DISADVANTAGES:**
No disadvantages identified at this time.

**ALTERNATIVES:**
Not applicable at this time.

**ENVIRONMENTAL REVIEW:**
No environmental review is required for this item.

**PUBLIC NOTIFICATION AND COMMENTS:**
The Agenda was posted at City Hall and on the City's website in accordance with Government Code Section 54954.2.

Attachments:
1. Lopez Reservoir Storage Projections
Lopez Reservoir Storage Projections
(precipitation scenario source: www.LongRangeWeather.com)

Revised: 4/30/2017

Notes:
- For "Dry Months" (April - October), projected increases and/or decreases in storage estimated to mimic conditions from 2015.
- For "Wet Months" (November - March), projected storage declines assume LRRP annual downstream release of 3,800 AFY and deliveries of 4,077 AFY.
- Storage projection for "Wet Months" assume that unsaturated conditions exist.
- Actual precipitation is the total of the previous month.
- Actual precipitation is the rainfall measured by FRM at Lopez Rec Area.

Last Month Stored State Water: 644.26 
This Month Stored State Water: 731.45

### April to Present Lopez Entitlement + Surplus Water Usage

- Deliveries are in acre feet. One acre foot = 325,850 gallons or 43,560 cubic feet. Safe yield is 8,730 acre feet.

### January to Present State Water Usage

- "Year to Date" is January to present for State water, April to present for Lopez deliveries, and July to present for rainfalls.

**Comments:**
- Reservoir is currently operated under the Low Reservoir Response Plan. Reservoir is above 20,000 AF therefore no reduction in entitlements.
- Surplus water shown is actually "Carry Over" water as designated in the LRRP and updated per BOS May 10, 2016 Declaration of Surplus.

1) Oceano supplied State Water to Canyon Crest via Arroyo Grande's Edna turn out. A total of 1.85 AF delivered to Canyon Crest was added to Oceano's State Water usage this month and 1.85 AF was subtracted from Arroyo Grande's usage this month.
