TO: CITY COUNCIL
FROM: TERESA MCCLISH, COMMUNITY DEVELOPMENT DIRECTOR
BY: JILL MCPEEK, CAPITAL IMPROVEMENT PROJECT MANAGER
SUBJECT: CONSIDERATION OF A RESOLUTION AUTHORIZING THE PURCHASE
OF TEMPORARY CONSTRUCTION EASEMENTS FOR THE BRIDGE
STREET BRIDGE REHABILITATION PROJECT
DATE: MAY 28, 2019

SUMMARY OF ACTION:
Adoption of the Resolution enables the Community Development Director to execute
agreements for Temporary Construction Easements needed to construct the Bridge
Street Bridge Rehabilitation project.

IMPACT ON FINANCIAL AND PERSONNEL RESOURCES:
The City has been successful in securing 100% grant funding through the Local Highway
Bridge Program (HBP) for the Bridge Street Bridge Rehabilitation project, which includes
$200,000 for purchasing Temporary Construction Easements. The total cost to purchase
the Temporary Construction Easements (TCEs) is $75,100. Staff time will be necessary
to coordinate construction activities with the contractor and construction management
consultants.

RECOMMENDATION:
It is recommended the City Council adopt a Resolution authorizing the Community
Development Director to execute agreements for Temporary Construction Easements
with property owners for construction of the Bridge Street Bridge Rehabilitation project.

BACKGROUND:
Due to various deficiencies, the Bridge Street Bridge is restricted to a 3-ton maximum
load limit and is in need of rehabilitation or replacement. In 2005, a Preliminary
Engineering Study (PES) was prepared that presented a preliminary set of alternatives
and associated costs for rehabilitating or replacing the bridge but efforts were halted due
to the required local match funds under the regular HBP program. In July 2010, the City
was made aware of an opportunity to receive 100% Federal funding and the City applied
for and was approved to receive 100% Federal funding. In May 2012, after a competitive
procurement process, the City retained Quincy Engineering, Inc. to begin preliminary
design and public outreach. Since that time, the City and its consultant team has diligently
worked with the community to understand their needs and perform bridge design. In
January 2015, the Council selected two alternatives for environmental study for the project, one for rehabilitation and one for replacement. In January 2017, the Council approved the elimination of the replacement alternative as the rehabilitation alternative is considered an avoidance alternative and must be the selected alternative under Section 4(f) of the Department of Transportation Act if it is feasible and prudent. In September 2017, the City Council approved the environmental document. Since that time, the City and its consultant team have proceeded with the design and right of way of the rehabilitation alternative and in July 2018, the Council approved an Agreement with Hamner, Jewell & Associates (HJA) to perform right of way acquisition and appraisal services for the project following a competitive acquisition process.

ANALYSIS OF ISSUES:
In order to construct the Bridge Street Bridge Rehabilitation project, TCEs will be required. A TCE allows a City and its contractors to enter a private property for temporary use during the construction of a project. For this project, existing utilities that are supported by the Bridge Street Bridge will need to be relocated during construction to adjacent private properties. In addition, TCEs are necessary to occupy areas for material and equipment staging, and to gain access points to the construction area.

While the Bridge Street Bridge Rehabilitation project will be constructed within the existing public right of way, TCEs will need to be acquired from three adjacent private properties for temporary use during construction of the project. The City’s offering prices were based on appraisals performed by a local appraiser, Ed Hawkes, as part of the HJA team. To ensure that fair market value was offered to the property owners for the purchase of the TCEs, a valuation was made by taking into consideration the highest and best use of the affected property, the size of the land, any improvements located thereon, and all other factors that affect fair market value. Appraisal reviews of Hawkes’ appraisals were performed by appraiser Dennis Greene, also part of the HJA team, to comply with federal appraisal review requirements.

Beginning in May 2018, City staff and HJA met with and offered to the three property owners the City’s initial offer for the TCEs. The team spent considerable effort coordinating with the property owners and in May 2019, was successful in securing agreement from the three property owners for the TCEs. Staff is recommending these agreements be executed now to ensure that the TCEs remain in effect during events such as a property being sold to a new owner.

The following is a summary of the three TCEs:

127 Bridge Street
- APN 007-491-016
- Property is located on the southeast corner of the Bridge Street Bridge
The City is purchasing a temporary construction and access easement (approximately 11,435 square feet) for purposes such as storage of materials, supplies and equipment. Acquisition amount $52,000

101 West Branch Street
- APN 007-481-001
- Property is located on the northwest corner of the Bridge Street Bridge
- The City is purchasing a temporary construction and access easement (approximately 1,250 square feet) for a temporary pedestrian access and utility bridge over Arroyo Grande creek
- Acquisition amount $6,800

135 Traffic Way
- APN 007-481-011
- Property is located on the southwest corner of the Bridge Street Bridge
- The City is purchasing a temporary construction and access easement (approximately 11,585 square feet) for a temporary pedestrian access and utility bridge over Arroyo Grande creek
- Acquisition amount $16,300

The proposed Resolution authorizes the Community Development Director to execute TCE Agreements with owners of the properties listed above.

ALTERNATIVES:
The following alternatives are provided for the Council’s consideration:

1. Approve staff’s recommendations;
2. Do not approve staff’s recommendations; or
3. Provide direction to staff.

ADVANTAGES:
Purchasing the TCEs will allow the City and its contractors to enter private properties during the construction of the project for purposes such as material and equipment staging and access points to the construction area, and for temporary pedestrian access and utility relocations. Bringing the Bridge Street Bridge up to standard loading conditions will remove the 3-ton maximum load limit and would allow fire and delivery trucks to utilize Bridge Street as a route. The project implements the Council goal to support City infrastructure.
DISADVANTAGES:
Some traffic related disruption within the Village will occur during construction activities.

ENVIRONMENTAL REVIEW:
No environmental review is required for the approval of the Resolution.

PUBLIC NOTIFICATION AND COMMENTS:
The Agenda was posted at City Hall and on the City’s website in accordance with Government Code Section 54954.2.
