Recommended Action: Receive and file a status report for the Central Coast Blue recycled water project.

Community Development Director McClish provided introductory comments and introduced Mr. Dan Heimel from Water Systems Consulting, Inc. who would be presenting the status report.

Dan Heimel, Water Systems Consulting, gave a presentation regarding the purpose of the Central Coast Blue Recycled Water Project, which is to provide a supplemental water source for the South County region, provided a project status update, spoke about the cost/benefit sharing framework, and reviewed next steps and the project schedule. Mr. Heimel responded to extensive questions from Council about the project.

Ben Fine, City of Pismo Beach Public Works Director, answered questions regarding potential options for storage of excess water that are being considered.

Mayor Ray Russom invited public comment. Speaking from the public was Mike Frederick, who commented on the project and asked for clarification regarding the phasing of the project. No further public comments were received.

In response to public comments, Mr. Fine explained that the wastewater treatment plant at the Sanitation District needs some upgrades, currently their affluent is not of a quality to be treated and injected into the groundwater basin, whereas the City of Pismo Beach's treatment plant is, and that is one of the primary reasons for moving forward with the Pismo plant now instead of waiting several years for those upgrades to take place.

No formal action was taken on this item. The status report was received and filed.

11. NEW BUSINESS

11.a. Consideration to Approve an Agreement with Omni Design Group, Inc. for the Conceptual Design of a Replacement Recreation Services Building, PW 2019-03.

Public Works Director Robeson and Recreation Services Director Bohlken presented the staff report and responded to extensive questions from Council.

Council comments and concerns ensued regarding the timeline for identifying key portions of the Soto Sports Complex Master Plan; whether the sales tax survey would include information to help identify if there would be community support for this project; a report on the Recreation Department's cost recovery efforts; clarification on the scope of the agreement with Omni Design Group; clarification regarding the timeline for the project; how long the current building is viable; the need for a contingency plan; location of a future building; the need for community outreach; the uncertainty of the funding; the use of Cal Poly resources; and pursuit of grants.

Action: Council Member Paulding moved to direct staff to wait for the survey results and then come back to Council with a reformulated approach with less specificity regarding the details and design for the building and more consideration of the overall Soto Sports Complex Master Plan; to develop a contingency plan; to have discussions with Cal Poly early on in the process to see where they can assist; to look for grant funding opportunities; to make sure that any concepts will meet all requirements for grant applications; and to include public outreach.
